

Outdoor learning

Childhaven Community Nursery School

Join us at Childhaven, as we consider how our nursery garden provides opportunities for mathematical learning all year round. We are an outstanding nursery school and we embrace modern practices, with many influencers, including the work of Reggio Emilio, Ferre Laevers well-being and involvement scales, Anna Ephgrave's In the Moment Planning, the Curiosity Approach, and the work of Greg Bottrill. We fully embrace working outdoors in all weathers. During each day there will be a mix of input / question and answer sessions and also practical observation of the school at work in its everyday wonder. There are three days, one in each term, so that you can see REAL progression over the year, and how we adjust the provision as the year goes on and for the different seasons. There will also be a focus on Mathematical Development on all the of the days, using latest research and recommendations from the EEF

Dates (both 9.30 am – 3pm)

Day 1 Wednesday 23rd November 2022

Day 2 - Wednesday 7th June 2023

Course suitable for practitioners who are developing their outdoor provision and practice in light of the new reforms. The same member of staff needs to attend both sessions.

Cost: £295 for both days
